Liberate your Workflow

GUARANTEED PERFORMANCE, SCALABILITY AND CHOICE

Join Pixit Media at NAB 2019 South Lower Hall Booth SL5724, where our team of expert storage and workflow consultants will showcase PixStor 5, the latest release of our software-defined data-driven storage solution.

Developed to meet the specific demands of complex media workflows, PixStor is an enterprise-class scale-out NAS platform delivering guaranteed performance for all types of workflow and a single global namespace across multiple storage tiers – from on-prem to the Cloud. It is fast becoming the de facto standard for leading content creators and distributors looking to dramatically improve storage performance and workflow efficiency, free from vendor lock-in.

This latest release offers significant enhancements to creative environments deploying the most demanding 4K and 8K workflows and addresses future business strategies with:.

- **greater integration of Cloud workflows**
- **security services aligned to TPN-audit standards**
- **enhanced search and analytics capabilities**

Live Any-K Workflow Demo

At NAB 2019, we're excited to provide a live demo of PixStor 5 at the heart of an entire end-to-end Any-K collaborative production environment. From ingest, processing, staging, production to archive, PixStor brings users and applications closer to the data, delivering efficiency at every step of the workflow.

Get up close with PixStor 5 to see for yourself how it delivers guaranteed extreme-bandwidth performance across any workflow and simplifies storage, security, management and artist-anywhere collaboration - with a seamless automated user-experience from disk, desktop to the Cloud.

Liberate your Workflow

GUARANTEED PERFORMANCE, SCALABILITY AND CHOICE

What you'll experience:

- **We take security seriously.** We'll demonstrate an audit-compliant workflow with multi-tenancy in a single storage fabric, aligned to TPN-accredited standards - for fast deployment of secure data environments.
- **Ngenea Multi-Site.** We'll ingest data from multiple locations including secure DMZ containers and the Cloud, with end points discovered and stubbed, rigorously scanned and delivered into the project workflow.
- **Cloud workflow flexibility.** Fully-automated deployment into Google Cloud Platform, enabling cost-effective hybrid workflows for burst render and cloud-first workflows for global collaboration.
- **Fast, easy and accurate search** across the entire single namespace using the latest AI and machine learning – all connected directly to the desktop for unparalleled visibility and access.
- **4K colour grading with Nucoda.** Digital Vision's Nucoda is a fully-featured ACES grading system, featuring 4K HDR grading & real-time EXR file format support.
- **We raise media processing to Any-K levels with Excelero.** Experience blistering-fast 8K simultaneous playback powered by Excelero NVmesh & Intel® Optane™ - supported by Boston Technologies.
- **Accelerate the performance of legacy storage without replacing it.** Connect PixStor to existing islands of storage to unleash new levels of breakthrough performance, greater workflow agility and significant ROI.
